Doubles the Number of Eggs.

To be successful with poultry requires a great deal more careful attention than many are apt to think. The house should be large and warm. The fowls should have plenty of exercise, but, more than that, the fowls should be given as food what their nature demands and what, if allowed free range, they could procure for themselves. "Page's Perfected Poultry Food" contains these ingredients in a carefully compounded ration. A. A. Olmsted of South Newbury, Vt., has the following to say in regard to this food: "We have been for some time using your 'Perfected Poultry Food' with such good results that we thought it a proper thing to tell you. It keeps our hens well and in good laying condition and we think, doubles the number of eggs. Being in good condition, they do not trouble."

Any one sending his address on a postal card to C. S. Page, Hyde Park, Vt., and mentioning this paper, will receive by mail, free, postpaid, a sample package of "Page's Perfected Poultry Food."

Can't Get Along Without "Page's Perfected Poultry Food."

Poultrymen should be careful to discriminate between "Page's Perfected Poultry Food" and the various "condition powders" with which the market is flooded nowadays. It is not a medicine in the strict sense of the word, but an honest food which, if the fowls are otherwise properly cared for, will return the poultryman more than 200 per cent profit. Mrs. H. H. Blanchard of Brownsville, Vt., expresses the common sentiment of users of this food. She says: "I have tried and led 'Page's Perfected Poultry Food' for two years and am now feeding it. Will say that I keep from 75 to 100 hens and think I cannot get along without it."
